AROMA CHEMICALS

THE CHEMICAL DISTRIBUTOR OF CHOICE

From wood to flavour – TER Chemicals competence in sourcing and distribution for more than 50 years

In the distillation process of natural crude resin, harvested from pine trees, two substances are fabricated in general: gum rosin (80% ratio) and balsamic turpentine oil (15% ratio). TER Chemicals is a leading importer of both substances from the respective places of origin worldwide to Europe. Turpentine oils are used as basic material for turpentine derivatives such as Alpha Pinene, Beta Pinene, Terpeneol, Campher und Myrcene. These materials are utilized to produce perfume oils, fragrances, essential oils, detergents, and disinfectants. Over time TER Chemicals has been able to expand the product portfolio more and more. Today TER Chemicals can also offer clove blossom derivatives, citral derivatives, castor oil derivatives and cedar wood derivatives of the highest quality.

The TER Chemicals Distribution Group has been delivering a wide variety of specialty chemicals and food ingredients for well over a hundred years. After such a long time, we know what's important and where we're headed. Our goal is very clear: We want to be your integral partner for procurement, logistics and product development. We want to be your first choice because you appreciate our service: the reliability regarding price and quality, the just-in-time precision and the product know-how. We want you to value our approach to cooperation: the integrity, the appreciation and the partnership. Our maxim is to create a sphere in which everybody – customers, suppliers, employees – feels respected, because that brings added value to all of us.

Today TER Chemicals Distribution Group operates as an international business alongside TER Plastics Polymer Group and Paramelt wax production. Together - the three of them form the TER Group headquartered in the heart of Hamburg, Germany.

Since 1993 we have been certified to the ISO standard. We also take part in the Responsible Care program not only in order to help the environment, but to ensure safety in the workplace and on transport. We regularly audit our suppliers to ensure that our customers receive the highest quality of products available.

We operate according to our vision "The Chemical Distributor of Choice". We want to prove that we live up to it.
