

PhytaPure™ PRO Silver Cluster Leaf

Active botanical concentrate for limiting damage
caused by environmental factors

Created from the shikimic acid-rich, wild harvested
leaves of the *Terminalia sericea* tree

Transparently Sourced

Certified

Corporation

**Clinically
Proven**

PhytaPure™ PRO
Silver Cluster Leaf

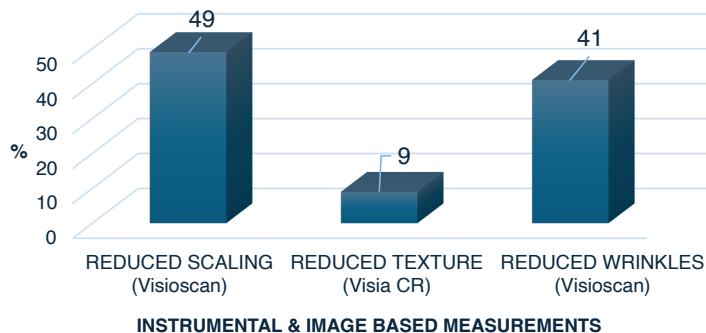

Rejuvenating & Clarifying

A gentle, natural exfoliator for
younger looking skin

Key Benefits:

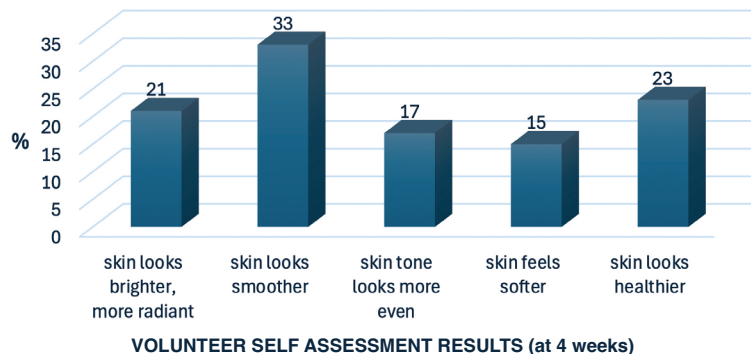

PhytaPure™ PRO Silver Cluster

% change from baseline

PhytaPure™ PRO Silver Cluster

% change from placebo

Results following a 4 week independent, randomized, placebo-controlled Study* performed using a simple base to determine the benefits of PhytaPure™ PRO Silver Cluster Extract. Statistically significant data shown by 2-way Analysis of Variance (ANOVA) using $p = 0.05$

Claims data presented based on 80th percentile values.

*20 women aged between 40-60 years of age

Sustainability & Biodiversity : We're Raising the Bar

We are passionate about the importance of green chemistry methods, in addition to sourcing with respect, protecting people engaged along our entire supply chain and attending to environmental impact and biodiversity considerations. These key elements are part of our DNA, and our values are fostered as a company-wide culture.

Our environmental management system

- Committed to reducing absolute scope 1 & 2 GHG emissions by 100% by 2030.
- Quantifiable targets & assessments for environmental aspects of our operations.
- 100% of energy use is produced from low-impact renewable sources.
- Monitored water usage & recorded emissions with science-based targets.
- Company-wide recycling program.
- Composting of waste botanical material.

By engaging in fair trade, especially with suppliers in developing countries, we can positively impact some of the poorest regions in the world. We prioritise working with organic and FairWild® certified producers, focusing on farming practices that contribute to biodiversity.

Corporation

Blue Sky Botanics is a member of UEBT. We have adopted a plan to advance sourcing practices that promotes a world in which all people and biodiversity thrive.

Manufacturing Process

Blue Sky Botanics uses Reverse Osmosis to concentrate extracts

This is a heat-free process, which protects active compounds from heat degradation

High pressure forces only water through the semi-permeable membrane

and thereby concentrates the solutes (including active compounds) that remain in the retentate

Green Chemistry extraction

Use of solar panels and renewable energy sources

Committed to net zero emission by 2030

**People, Planet, Plants,
Our Passion, Our Promise**

Our Primary Source

The Silver Cluster Leaves will be harvested in the KAZA region of Namibia involving 4 community forests – Kwandu, Sachona, Lubuta & Masida. The aim is to develop a commercial opportunity for smallholders in the KAZA region based on the sustainable use of wild-harvested plants.

PhytaPure™PRO Silver Cluster Leaf has been developed to ensure high social and planetary impact.

Connecting fragmented habitats, game reserves and wildlife corridors is essential for ensuring safe passage for wild animals, significantly diminishing human-wildlife conflict. Moreover, creating drought resilient livelihoods and value-added opportunities for marginalized communities, fosters economic growth and resilience in the face of environmental challenges.

Ingredient composition:	<i>Terminalia sericea</i> Leaf Extract (and) Aqua (and) Glycerin (and) Citric Acid (and) Sodium Benzoate (and) Potassium Sorbate
Standardised for:	Shikimic Acid
Suitable for a variety of skincare applications:	lotions, creams, masks
Recommended use level:	5%
Appearance:	yellow/orange to brown (100%), burnt orange/amber (at 5% in gel base)
Aroma:	sweet, herbal, floral, tannins
Stability:	Transparent gel base measured at 2 weeks* Colour: room temp, 40°C & 50°C no change Aroma: room temp, 40°C & 50°C no change
Packaging:	5kg
Shelf life:	12M (unopened) from date of manufacture
Storage conditions:	dark & dry environment (5.0-20.0°C)

ISO16128 Natural Index 1

Natural Origin Content 99.73% Natural Content 79.53%

Clinically proven to be mild on sensitive skin

(Patch Test & findings from the study demonstrate this concentrated Extract is well tolerated)

*based on 2 week test period in a simple gel base (customers will need to perform their own stability assessment to conclude)
